bachelor thesis from the year 2010 in the subject economics foreign trade theory trade policy grade 1 0 vienna university of economics and business institut für außenwirtschaft und entwicklung language english abstract the following paper relates two of the most important economic phenomena namely economic growth and international trade before analysing the relationship between two economic phenomena in detail an overview of some of the most prominent empirical studies concerning the relationship between openness to international trade and economic growth in general is provided as most of them seem to have reached the conclusion that trade influences growth in a positive way the question for the reasons of this presumably positive relationship arises factors which cause or influence economic growth in general as well as various channels through which trade might have an influence on growth are presented in the third and forth section the importance of various sources of economic and the solow model and the ak model are introduced in order to distinguish between long run and short run effects of capital accumulation learning by doing and r d on economic growth the remaining analysis concentrates on one channel in particular namely on how trade determines a country s import and export structure the importance of the range of products a country produces is enormous and affects economic growth and welfare the fifth section introduces the static ricardian model of comparative advantage in order to show how productivity levels dictate the patterns of trade and determine which products a country produces depending on static productivity levels at the time a country opens up to trade since productivity levels do however not remain constant but are influenced by learning by doing and specialisation dynamic effects of specialisation on comparative advantage should not be neglected for this purpose a model of dynamic comparative advantage is introduced in the sixth section it shows how comparative advantages which exist at the time an economy opens up to trade tend to lock in and determine trade patterns in the long run the question is raised when an economy should open up to trade and a justification of the infant industry argument is provided on theoretical grounds the paper is concluded by a welfare analysis which tries to answer the question under which conditions free trade or protectionist policies are best suited for a country

this textbook by hendrik van den berg on economic growth and development presents a long awaited synthesis of development economics and growth theory it also incorporates the recent contributions to our understanding of economic growth from the fields of economic history and the new institutional economics by basing its analysis on the recent advances in growth theory the book offers a unified approach to all episodes of economic growth for

countries at all levels of development and throughout history students will be comfortable with an analysis that enables them to understand economic growth in their own country as well as in economies very different from their own the unified theoretical framework greatly facilitates students understanding of the process of economic growth and the many cases and examples highlight the fascinating diversity of our world

the conventional belief that all regions have equally benefited from china s remarkable development over the last three decades is subjected to criticism in this book as hong yu systematically analyses the issue of regional inequality during the post 1978 period using the case of guangdong guangdong is one of the key industrial centres and economic powerhouses in china and as a pioneer province instigating economic reform as china opened up to the world it offers an ideal focus upon which to question and enrich the western theories of economic geography and regional disparity based on field research analysis of geographic characteristics and regression models this book illustrates how guangdong s impressive development record has been marred by its rising regional disparity investigates the main causes of this disparity and draws conclusions regarding the lessons china can learn from it economic development and inequality in china will be of interest to students and scholars of chinese economics chinese regional studies economic geography and china studies hong yu is a visiting research fellow at the national university of singapore his research interests lie in the field of regional economy he is the author of a chapter on china s two delta regions in the book china and the global economic crisis

the pursuit of economic growth is at the top of every nation s policy agenda at the end of the 20th century this authoritative and comprehensive book goes beyond the narrowly based convergence model of economic growth by considering global national and regional patterns of growth from a comparative perspective issues examined include the evolution of the firm and the role of r d long term implications of the loss of national sovereignty international openness social and political institutions patterns of regional harmonization in the united states particularly income and earnings trends across states and the reasons for convergence persistent regional disparities in europe including the roles of sectoral transformation regional spillovers human capital formation and the allocation of structural funds the experience of convergence in individual countries including italy the uk spain and germany

four stylised facts of aggregate economic growth are set up initially the growth process is interpreted to represent transitional dynamics rather than balanced growth equilibria against this background the fundamental importance of subsistence consumption is comprehensively analysed subsequently the meaning of the productive consumption hypothesis for the intertemporal consumption trade off and the growth process is investigated finally the process of growth is analysed empirically by means of cross sectional conditional convergence regressions with endogenous control variables

drawing upon different and often conflicting growth theories this book enables an understanding of the growth processes in the developing world it is useful to students of development studies asia studies and public policy as well as research scholars and practitioners including government officials and policymakers
